

Type 8025 can be combined with...

Type S020
INSERTION fitting

Type 2301 (8692)
ELEMENT control
valve system

Type 2030
On/Off diaphragm
valve

Type 8644
Valve islands

PLC

INSERTION Flowmeter with paddle wheel and flow transmitter

- Up to PN10, size of measurement pipes: DN06 to DN400
- Display for indication of flow rate and volume with two flow totalizers
- Automatic calibration using Teach-In
- All outputs can be checked without the need of actual flow

The 8025 flowmeter is specially designed for measuring the flow rate in neutral, slightly aggressive, solid-free liquids.

Type 8025 is offered in different models:

• **The compact flowmeter**

with paddle wheel sensor is available in two versions: standard output signal or battery powered indicator version without output (page 2...7).

• **The remote transmitter**

is available in two versions:

– **Universal transmitter** for panel or wall-mounted versions, which can be connected to any sensors already on the market; sensors with open collector output,reed relay output, TTL, CMOS or coil can be operated by this transmitter (page 8...12).

– **Transmitter**, for panel or wall mounting: standard input signal for connection to the Bürkert 8020/8030/SE30+S077 flowmeter "Low Power" version (page 13...16).

General data (common to the various versions)

| | |
|---|--|
| Display | 15 x 60 mm, 8-digit LCD, alphanumeric, 15 segments, 9 mm high |
| Connection cable | max. 50 m, shielded, 0.2...1.5 mm ² wires cross-section |
| Environment | |
| Relative humidity | ≤ 80 %, without condensation |
| High above sea level | Max. 2000 m |
| Standards, directives and certifications | |
| Standards and directives CE | The applied standards, which verify conformity with the EU Directives, can be found on the EU Type Examination Certificate and/or the EU Declaration of conformity (if applicable) |
| Certification UL-Recognized for US and Canada | UL61010-1 + CAN/CSA-C22.2 No.61010-1 |

The compact flowmeter

The compact flowmeter is available in two versions:

- Standard signal (4...20 mA, frequency)
- Battery-powered indicator/totalizer

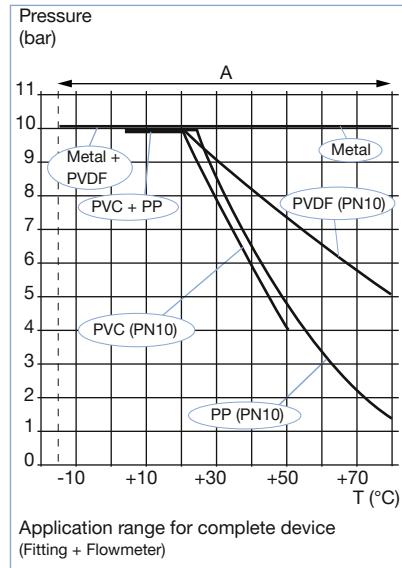

The flowmeter combines a paddle wheel flow sensor and an electronic module with a display in an IP65 enclosure.

The electrical connection is provided via a cable plug or two cable glands (standard signal version).

Bürkert designed fitting S020 ensures simple installation of the Bürkert flowmeter into pipes from DN20...DN400.

Pressure/temperature chart

¹⁾ with battery version = 100 °C (212 °F)

²⁾ = "measurement bias" as defined in the standard JCGM 200:2012

³⁾ Under reference conditions i.e. measuring fluid = water, ambient and water temperature = 20 °C (68 °F), while maintaining the minimum inlet and outlet distances and the appropriate internal diameter of the pipes.

* F.S. = Full scale (10 m/s)

| General data | |
|--|---|
| Compatibility | With Bürkert INSERTION Fitting S020 (see corresponding datasheet) |
| Materials | Housing, cover, lid, nut Front panel foil / Screws Cable plug or glands Wetted parts Sensor holder, paddle wheel Seal Axis and bearings |

| Fluid pressure max. | PN10 (145 PSI) - see pressure/temperature chart |
| Viscosity / Particles rate | 300 cSt max. / 1 % max. |
| Measurement deviation²⁾ | Teach-In Standard K-factor ± 1 % of the measured value (at Teach-In flow rate value) ³⁾ ± 2.5 % of the measured value ³⁾ |
| Linearity | ± 0.5 % of F.S. ³⁾ |
| Repeatability | ± 0.4 % of the measured value ³⁾ |
| Electrical data | |
| Power supply (V+) | Standard signal version 12...36 V DC ± 10 %, filtered and regulated, SELV (safety extra low voltage) circuit with a non dangerous energy level or 115/230 V AC 50/60 Hz (see technical specifications 115/230 V AC) Battery indicator/totalizer version 4 x 1.5 V DC non-rechargeable alkaline AA batteries, lifetime 4 years at 20 °C (68 °F) |
| Characteristics of the power source (not provided) of UL-Recognized devices | Limited power source (according to § 9.4 of the UL61010-1 standard) or, Class 2 type power source (according to the 1310/1585 and 60950-1 standards) |
| Current consumption with sensor | Without pulse output consumption ≤ 70 mA (at 12 V DC with relays) ≤ 25 mA (at 12 V DC without relays) |
| Protection | Reversed polarity of DC: protected Voltage peak: protected Short circuit: protected for transistor outputs |
| Output | Standard signal version Pulse (potential free transistor) Polarized, NPN or PNP (wiring dependant); function: pulse output, adjustable pulse value, 2.5...400 Hz; 5...36 V DC; 100 mA, line drop at 100 mA: 2.5 V DC; duty cycle: 0.5 |
| Relay | 2 relays, hysteresis, adjustable thresholds, normally open, 230 V AC/3 A or 40 V DC/3 A (resistive load) |
| Current | 4...20 mA (3-wire with relays; 2-wire without relay), sourcing or sinking (wiring dependant), max. loop impedance: 900 Ω at 30 V DC, 600 Ω at 24 V DC, 50 Ω at 12 V DC, 800 Ω with a 115/230 V AC voltage supply 6 s (default) |
| Response time (10 %...90 %) | |
| Battery indicator/totalizer version | None |
| Uncertainty of measurement (4...20 mA output) | ± 1 % of range |

Technical specifications 115/230 V AC

| | |
|--|--|
| Voltage supply available inside the device | 27 V DC regulated, max. current: 125 mA integrated protection: fuse 125 mA temporised power: 3 VA |
| Environment | |
| Ambient temperature (operation and storage) | -10...+60 °C (+14...+140 °F) (12...36 V DC version) -10...+50 °C (+14...+122 °F) (115/230 V AC version) -10...+55 °C (+14...+131 °F) (batteries version) |
| Standards, directives and certifications | |
| Protection class (according to EN60529) | IP65 with device wired, cover and lid screwed tight and cable plug or glands mounted and tightened or with blind plug if not used. |
| Standards and directives CE Pressure | Complying with article 4, §1 of 2014/68/EU directive* |
| Specific technical data of UL-Recognized products for US and Canada | |
| Relay output | 30 V AC and 42 V peak max./3 A or 60 V DC max./1 A |
| Ambient temperature | 0...+40 °C (32...+104 °F) |
| Relative humidity | max. 80 %, without condensation |
| Intended for an inner pollution | Pollution degree 2 according to EN 61010-1 |
| Installation category | Category I according to UL61010-1 – indoor use |

* For the 2014/68/EU pressure directive, the device can only be used under the following conditions (depends on max. pressure, pipe diameter and fluid).

| Type of Fluid | Conditions |
|-----------------------------------|-------------------------------------|
| Fluid group 1, article 4, §1.c.i | DN ≤ 25 |
| Fluid group 2, article 4, §1.c.i | DN ≤ 32 or PN*DN ≤ 1000 |
| Fluid group 1, article 4, §1.c.ii | DN ≤ 25 or PN*DN ≤ 2000 |
| Fluid group 2, article 4, §1.c.ii | DN ≤ 200 or PN ≤ 10 or PN*DN ≤ 5000 |

! If the device is mounted in a humid environment or outside, then the maximum voltage allowed is **35 V DC** instead of 36 V DC.

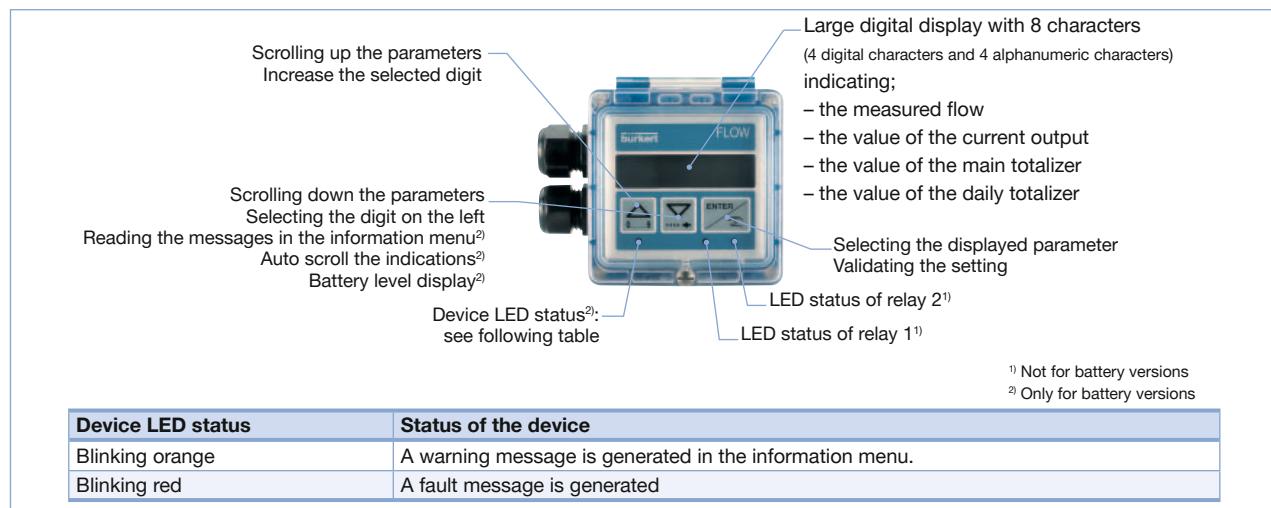

Operation and display

The device is calibrated by means of the K-factor (conversion coefficient) which is either entered or determined via the Teach-In function. User adjustments, such as measuring range, engineering units, pulse output and filtering level (damping) are carried out via the device operators interface.

The operation is specified according to two or three levels, depending on the flowmeter version:

| | Indication in operating mode/display | Parameter definition | Test |
|------------------------------------|--|--|--|
| Flowmeter | <ul style="list-style-type: none"> • flow rate • output current • main totalizer • daily totalizer with reset function | <ul style="list-style-type: none"> • language • engineering units • K-factor/Teach-In function • measuring range 4...20 mA • pulse output • relay (option) • filter (damping) • reset main totalizer | <ul style="list-style-type: none"> • alteration of basic adjustment (offset, span) • frequency test of sensor • flow simulation |
| Battery indicator/totalizer | <ul style="list-style-type: none"> • flow rate • main totalizer • daily totalizer with reset function | <ul style="list-style-type: none"> • language • engineering units • K-factor/Teach-In function • filter (damping) • reset main totalizer | <ul style="list-style-type: none"> • frequency test of sensor • warning and fault messages generating |

Description of the navigation keys and the LEDs status

Principle of operation

When liquid flows through the pipe, the paddle wheel with 4 inserted magnets is set in rotation, producing a measuring signal in the sensor (Coil or Hall sensor). The frequency modulated induced voltage is proportional to the flow velocity of the fluid.

A conversion coefficient (K-factor, available in the instruction manual of the S020 fitting), specific to each pipe (size and material) enables the conversion of this frequency into flow rate.

The electronic component converts the measured signal into several outputs (according to the flowmeter version) and displays the actual value. Totalizers are used to obtain the volume of fluid passed through the pipe.

Installation

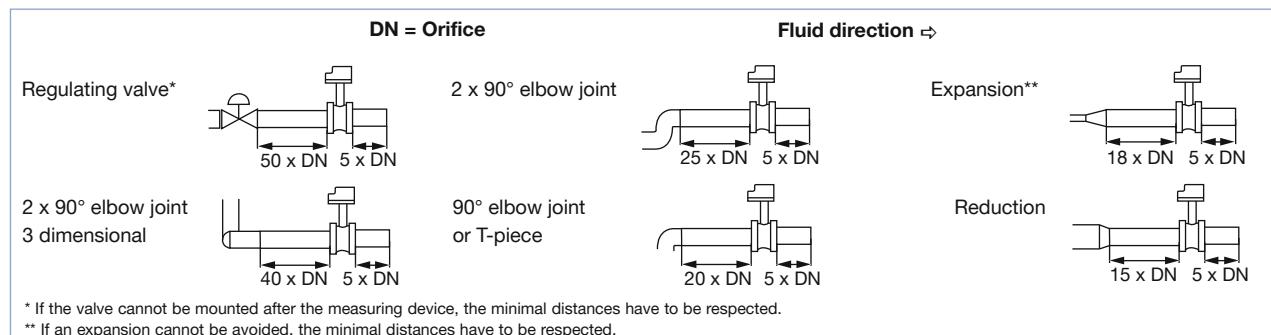

The 8025 flowmeter can easily be installed into any Burkert INSERTION fitting system (S020), by just fixing the main nut.

Minimum straight upstream and downstream distances must be observed. According to the pipe's design, necessary distances can be bigger or use a flow conditioner to obtain the best accuracy.

For more information, please refer to EN ISO 5167-1.

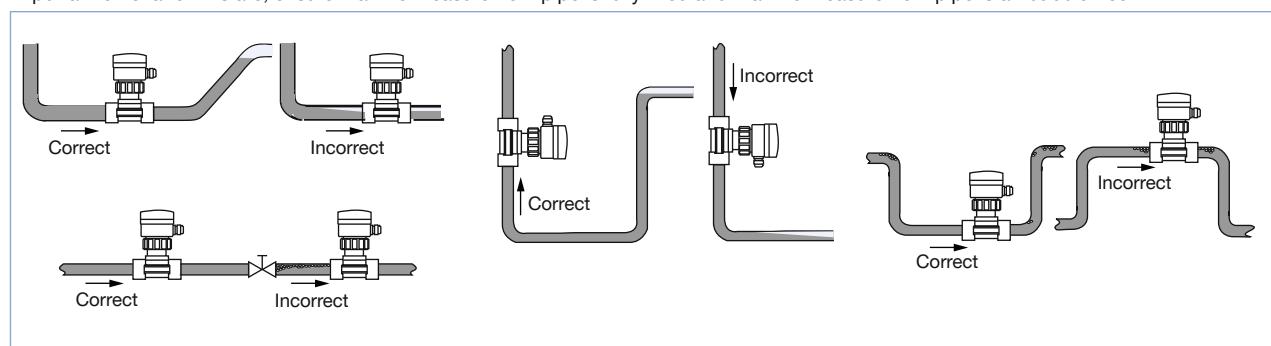

EN ISO 5167-1 prescribes the straight inlet and outlet distances that must be complied with when installing fittings in pipe lines in order to achieve calm flow conditions. The most important layouts that could lead to turbulence in the flow are shown below, together with the associated prescribed minimum inlet and outlet distances.

These ensure calm, problem-free measurement conditions at the measurement point.

The flowmeter can be installed into either horizontal or vertical pipes.

Important criteria for this are; ensure that the measurement pipe is fully filled and that the measurement pipe is air bubble free.

Pressure and temperature ratings must be respected according to the selected fitting material.

The suitable pipe size is selected using the diagram Flow/Velocity/DN.

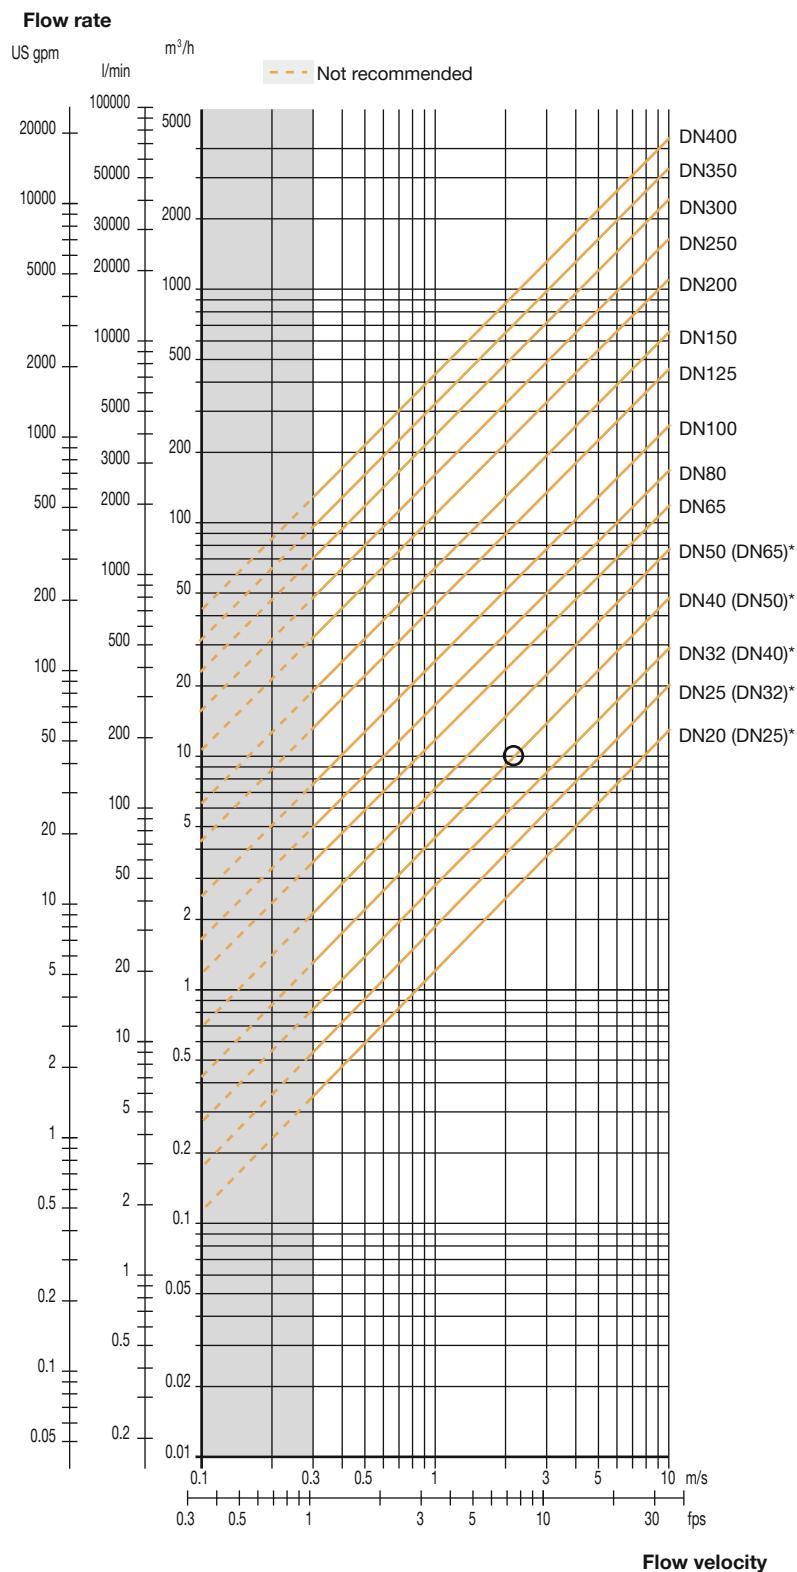

The flowmeter is not designed for gas and steam flow measurement.

Diagram Flow/Velocity/DN

Example:

- Specification of nominal flow: 10 m³/h
- Ideal flow velocity: 2...3 m/s

For these specifications, the diagram indicates a pipe size of DN40 (or DN50 for (* mentioned fittings)

* for following fittings with:

- external threads acc. to SMS 1145
- weld ends acc. to SMS 3008, BS4825-1/ASME BPE/DIN 11866 series C or DIN 11850 series 2/DIN 11866 series A/DIN EN 10357 series A
- Clamp acc. to SMS 3017, BS 4825-3/ASME BPE or DIN 32676 series A

Ordering information and chart for compact flowmeter

A complete 8025 flowmeter with integrated paddle wheel sensor consists of a compact 8025 flowmeter and a Bürkert S020 INSERTION fitting.

The following information is necessary for the selection of a complete device:

- **Item no.** of the desired compact **8025** flowmeter (see ordering chart below)
- **Item no.** of the selected **S020** INSERTION fitting (see separate datasheet)

More info.

→ You have to order the two components separately.

When you click on the orange box "More info.", you will come to our website for the resp. product where you can download the datasheet.

The remote Universal transmitter

The remote 8025 Universal transmitter
can be associated with Bürkert flowmeter 8020, 8030, SE30 + S077, ... or another flow sensor which emits a frequency signal (with pulse output signal).

When connected to a flowmeter, the device makes it possible to switch a solenoid valve, activate an alarm or generate a flow rate proportional frequency, thanks to a digital output and, for some versions, by means of two relay outputs, fully configurable, and to establish a control loop thanks to a 4...20 mA current output.

The remote 8025 Universal is a flow transmitter with display, available in wall-mounted and panel versions:

The panel version

is made up of an electronics integrated in an open housing with display. The electrical connection is carried out on the terminal blocks of the electronic board.

The wall-mounted version

is made up of an electronics integrated in a housing with cover and display. The electrical connection is carried out on the terminal blocks of the electronic board via 3 cable glands.

The device is equipped with a 4...20 mA current output (analogue output, called AO1), a digital output (configured as a pulse output by default, called DO1) and two totalizers.

Some versions are also fitted with two relay outputs (called DO2 and DO3).

The device operates on a 3 wire system and needs a 12...36 V DC or a 115/230 V AC power supply.

| General data | |
|--|---|
| Compatibility | Bürkert flowmeter with frequency output (8020, 8030, 8030HT, 8041, 8031, SE30 + S077, 8071, 8077) or other sensors with compatible electrical data. |
| Materials | Housing, cover Front panel foil Screws Cable glands Cable clips |
| Electrical connections | PC (panel-mounted version); ABS (wall-mounted version) Polyester Stainless steel PA (wall-mounted version) PA (panel-mounted version) |
| Connection cable | Terminals (panel-mounted version) or terminals via gland M16 x 1.5 (wall-mounted version) 4...8 mm external cable diameter (for the cable glands of the wall-mounted version) |
| Electrical data | |
| Power supply (V+) | 12...36 V DC (max. tolerance: -5 % or +10 % at 12 V DC; ±10 % at 36 V DC), filtered and regulated, SELV (safety extra low voltage) circuit with a non dangerous energy level or 115/230 V AC 50/60 Hz (see technical specifications 115/230 V AC) |
| Characteristics of the power source (not provided) of UL-Recognized devices | Limited power source (according to § 9.4 of the UL61010-1 standard) or, Class 2 type power source (according to the 1310/1585 and 60950-1 standards) |
| Current consumption without sensor | Without consumption of 4...20 mA output of the flow-meter Version with relay ≤ 70 mA (at 12 V DC); ≤ 45 mA (at 36 V DC); ≤ 50 mA (115/230 V AC) |
| Version without relays | ≤ 50 mA (at 12 V DC); ≤ 30 mA (at 36 V DC); ≤ 35 mA (115/230 V AC) |
| Protection | Reversed polarity of DC: protected Voltage peak: protected Short circuit: protected for transistor outputs |
| Transmitter input (from sensor) | Frequency range Voltage Type of the signal |
| | 0.6 Hz...2.2 kHz, can be adjusted - Max. 36 V DC - Pulse: open collector NPN (with 470 Ω or 2.2 kΩ resistance) or PNP, TTL, CMOS (with 39 kΩ resistance) - Sine-wave, coil (with 39 kΩ resistance – with minimum sensitivity of 50 mV peak to peak) |
| Transmitter output (to sensor) | Voltage supply |
| | - With a 12...36 V DC powered transmitter: ■ 10.5...34.5 V DC [= (V+) - 1.5 V DC], 140 mA max. ■ 0...23.5 V DC [= (V+) - 12.5 V DC], 80 mA max. ■ 5 V DC, 30 mA max., regulated - With a 115/230 V AC powered transmitter: ■ +27 V DC, 80 mA max. ■ +14.5 V DC [= (V+) - 12.5 V DC] 80 mA max., non regulated ■ 5 V DC, 30 mA max. |

! If the device is mounted in a humid environment or outside, then the maximum voltage allowed is **35 V DC** instead of 36 V DC.

Electrical data (continued)

Output

Transistor (digital output – DO1)

Polarized, potential free, NPN or PNP (wiring dependant),
function: pulse output, adjustable pulse value,
0.6...2200 Hz, 5...36 V DC; 100 mA,
line drop at 100 mA: 2.7 V DC,
duty cycle:

- > 0.45 if 0.6 < frequency < 300 Hz
- > 0.4 if 300 < frequency < 1500 Hz
- < 0.4 if 1500 < frequency < 2200 Hz

Galvanic insulation,

Relay (digital output – DO2 and DO3)

2 relays, hysteresis, adjustable thresholds, normally open; 230 V AC/3 A or 40 V DC/3 A (resistive load)
max. cutting power of 750 VA (resistive load),
life span of min. 100000 cycles

Current (analogue output – AO1)

4...20 mA, sourcing or sinking (wiring dependant), 22 mA
to indicate a fault (can be activated);
max. loop impedance: 1300 Ω at 36 V DC, 1000 Ω at
30 V DC, 750 Ω at 24 V DC, 300 Ω at 15 V DC, 200 Ω
at 12 V DC
900 Ω with a 115/230 V AC voltage supply

Ordering information and chart for remote Universal transmitter

A complete remote 8025 Universal transmitter (panel- or wall-mounted), for connection to Bürkert or other sensors, consists of a remote 8025 Universal transmitter and a Bürkert flowmeter* or other compatible flowsensor on the market.

The following information is necessary for the selection of a complete device:

- **Item no.** of the desired **remote 8025 Universal** transmitter (see ordering chart below)
- **Item no.** of the selected **Bürkert flowmeter*** (see separate datasheet – has to be ordered separately)

→ You have to order the two components separately.

All these versions have as minimum:

- a 4...20 mA current output (AO1)
- a digital output (DO1)
- two totalizers

| Specifications | Voltage supply | Output | Relays | Sensor version | Electrical connection | Item no. |
|---|----------------|--------------------------------|-----------|----------------|-----------------------|----------|
| Universal transmitter, panel mounted | 12...36 V DC | 4...20 mA (3 wires) + pulse | None 2 | see note | Terminal strip | 419 538 |

The remote transmitter

The remote 8025 transmitter can only be associated with Burkert flowmeter 8020, 8030, SE30 + S077, ... with sinus or pulse output signal in a “Low Power” version.

When connected to a flowmeter, the device makes it possible to switch a solenoid valve, activate an alarm or generate a flow rate proportional frequency, thanks to a digital output and, for some versions, by means of two relay outputs, fully configurable, and to establish a control loop thanks to a 4...20 mA current output.

The remote 8025 is a flow transmitter with display, available in wall-mounted and panel versions:

The panel version

is made up of an electronics integrated in an open housing with display. The electrical connection is carried out on the terminal blocks of the electronic board.

The wall-mounted version

is made up of an electronics integrated in a housing with cover and display. The electrical connection is carried out on the terminal blocks of the electronic board via 3 cable glands.

The device is equipped with a 4...20 mA current output (analogue output), a digital output (pulse output) and two totalizers. Some versions are also fitted with two relay outputs. The device operates on a 2- or 3-wire system and needs a 12...36 V DC or a 115/230 V AC power supply.

| Materials | Housing, cover Front panel foil Screws Cable glands Cable clips |
| Electrical connections | PC (panel-mounted version); ABS (wall-mounted version) Polyester Stainless steel PA (wall-mounted version) PA (panel-mounted version) |
| Connection cable | Terminals (panel-mounted version) or terminals via gland M16 x 1.5 (wall-mounted version) |
| Electrical data | |
| Power supply (V+) | 12...36 V DC ±10 %, filtered and regulated, SELV (safety extra low voltage) circuit with a non dangerous energy level |
| Panel-mounted version | 12...36 V DC ±10 %, filtered and regulated, SELV (safety extra low voltage) circuit with a non dangerous energy level or 15/230 V AC 50/60 Hz (see technical specifications 115/230 V AC) |
| Wall-mounted version | 12...36 V DC ±10 %, filtered and regulated, SELV (safety extra low voltage) circuit with a non dangerous energy level or 15/230 V AC 50/60 Hz (see technical specifications 115/230 V AC) |
| Characteristics of the power source (not provided) of UL-Recognized devices | Limited power source (according to § 9.4 of the UL61010-1 standard) or, Class 2 type power source (according to the 1310/1585 and 60950-1 standards) |
| Current consumption with sensor | Without pulse output consumption ≤ 70 mA (at 12 V DC with relays) ≤ 25 mA (at 12 V DC without relays) |
| Protection | Reversed polarity of DC: protected Voltage peak: protected Short circuit: protected for transistor outputs |
| Transmitter input (from sensor) | 2.5...400 Hz, “Low Power”, NPN open collector |
| Frequency range | |
| Pulse signal (Hall) | |
| Transmitter output (to sensor) | 10...34 V DC [= (V+) - 2 V DC], 1 mA max. |
| Voltage supply | |
| Output | Polarized, potential free, NPN or PNP (wiring dependant), function: pulse output, adjustable pulse value, 2.5...400 Hz, 5...36 V DC; 100 mA, line drop at 100 mA: 2.5 V DC, duty cycle: 0.5 Galvanic insulation. |
| Pulse (Transistor) | |
| Relay | 2 relays, hysteresis, adjustable thresholds, normally open; 230 V AC/3 A or 40 V DC/3 A (resistive load) |
| Current | 4...20 mA (3-wire with relays; 2-wire without relay), sourcing or sinking (wiring dependant), max. loop impedance: 900 Ω at 30 V DC, 600 Ω at 24 V DC, 50 Ω at 12 V DC, 800 Ω with a 115/230 V AC voltage supply |
| Response time (10 %...90 %) | 6 s (default) |
| Uncertainty of measurement (4...20 mA output) | ±1 % of range |
| Technical specifications 115/230 V AC | |
| Voltage supply available inside the device | Wall-mounted version: 27 V DC regulated, max. current: 250 mA integrated protection: fuse 250 mA temporised power: 6 VA |
| Environment | |
| Ambient temperature | -10...+60 °C (+14...+140 °F) (operation and storage) |

! If the device is mounted in a humid environment or outside, then the maximum voltage allowed is **35 V DC** instead of 36 V DC.

| Standards, directives and certifications | |
|--|--|
| Protection class | (according to EN60529) |
| Wall-mounted version | IP65 with device wired, cover screwed tight and cable glands tightened. |
| Panel-mounted version | Front side: IP65 installation completed and closed cabinet Rear side: IP20, inside the closed cabinet |
| Specific technical data of UL-Recognized products for US and Canada | |
| Relay output | 30 V AC and 42 V peak max./3 A or 60 V DC max./1 A |
| Ambient temperature | 0...+40 °C (32...+104 °F) |
| Relative humidity | max. 80 %, without condensation |
| Intended for an inner pollution | Pollution degree 2 according to EN 61010-1 |
| Installation category | Category I according to UL61010-1 – indoor use |

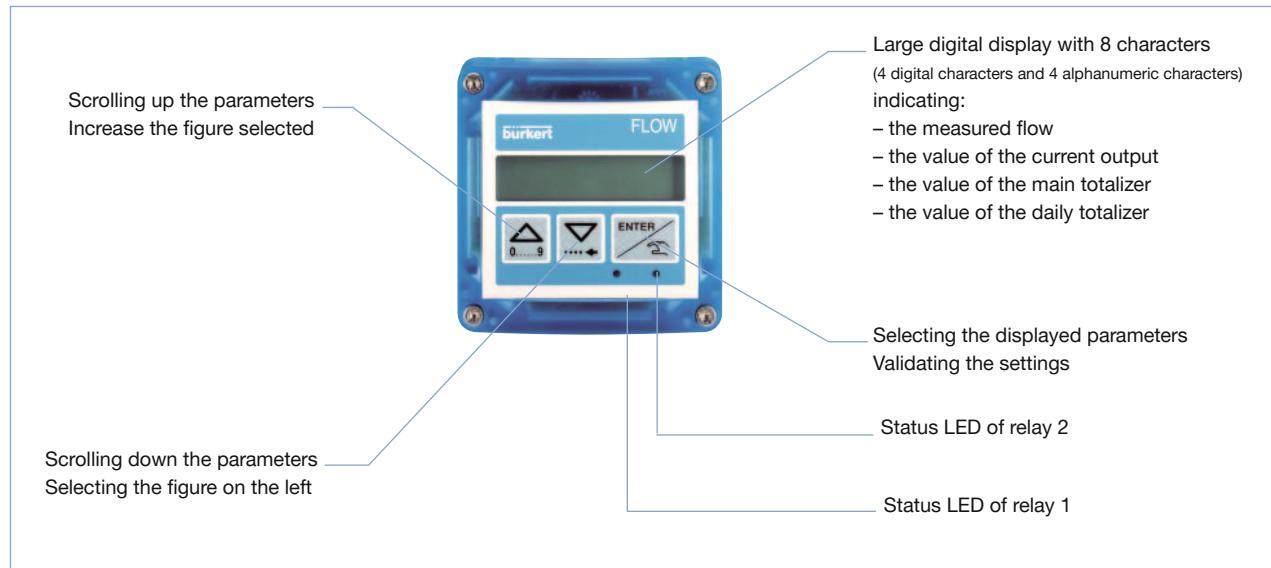

Operation and display

The device is calibrated by means of the K-factor (conversion coefficient) which is either entered or determined via the Teach-In function. User adjustments, such as measuring range, engineering units, pulse output and filtering level (damping) are carried out via the device operators interface.

The operation is specified according to two or three levels, depending on the transmitter version:

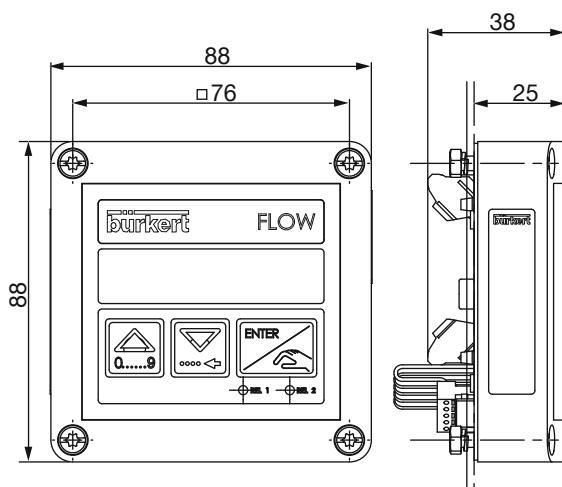

| | Indication in operating mode/display | Parameter definition | Test |
|-------------------------|--|--|--|
| Flow transmitter | <ul style="list-style-type: none"> • flow rate • output current • main totalizer • daily totalizer with reset function | <ul style="list-style-type: none"> • language • engineering units • K-factor/Teach-In function • measuring range 4...20 mA • pulse output • relay (option) • filter (damping) • reset main totalizer | <ul style="list-style-type: none"> • alteration of basic adjustment (offset, span) • frequency test of sensor • flow simulation |

Ordering information and chart for remote transmitter

A complete remote 8025 transmitter (panel- or wall-mounted), for connection to Burkert "Low Power" sensors only, consists of a remote 8025 transmitter, a Burkert 8020 flowmeter associated to an INSERTION S020 fitting or a SE30 flow transmitter associated to an INLINE sensor-fitting type S030 (SE30 + S030 = type 8030) or type S077.

The following information is necessary for the selection of a complete device:

- **Item no.** of the desired remote **8025** transmitter (see ordering chart below)
- **Item no.** of the selected Burkert **8020** flowmeter* or **INLINE SE30** transmitter* (pulse "Low Power" version) - (see corresponding datasheet – has to be ordered separately)
- **Item no.** of the selected Burkert **S020** fitting (DN20...DN400) or **INLINE S030** sensor-fitting (DN06...DN65) or **INLINE S077** sensor-fitting (DN15...DN100) – (see corresponding datasheet – has to be ordered separately)

→ You have to order the three components separately.

| Specifications | Voltage supply | Output | Relays | Sensor version | Electrical connection | Item no. |
|---|----------------------------------|--------------------------------|--------|--|-----------------------|----------|
| Transmitter, panel mounted, 2 totalizers UL-Recognized for US and Canada | 12...36 V DC | 4...20 mA (2 wires) + pulse | None | 8020/8030 ¹⁾ / SE30+S077 | Terminal strip | 418 992 |
| | | 4...20 mA (3 wires) + pulse | 2 | | Terminal strip | 418 994 |
| | 12...36 V DC | 4...20 mA (2 wires) + pulse | None | | Terminal strip | 552 725 |
| | | 4...20 mA (3 wires) + pulse | 2 | | Terminal strip | 552 726 |
| | 12...36 V DC 115/230 V AC | 4...20 mA (2 wires) + pulse | None | | 3 cable glands | 418 397 |
| | | 4...20 mA (3 wires) + pulse | 2 | | 3 cable glands | 418 396 |
| | | 4...20 mA (2 wires) + pulse | None | | 3 cable glands | 418 400 |
| | | 4...20 mA (3 wires) + pulse | 2 | | 3 cable glands | 418 399 |

¹⁾ 8030 = SE30 + S030

*Note: See the chart about compatible and recommended interconnection possibilities with Burkert flowmeters on page 17.

Ordering chart - accessories (has to be ordered separately)

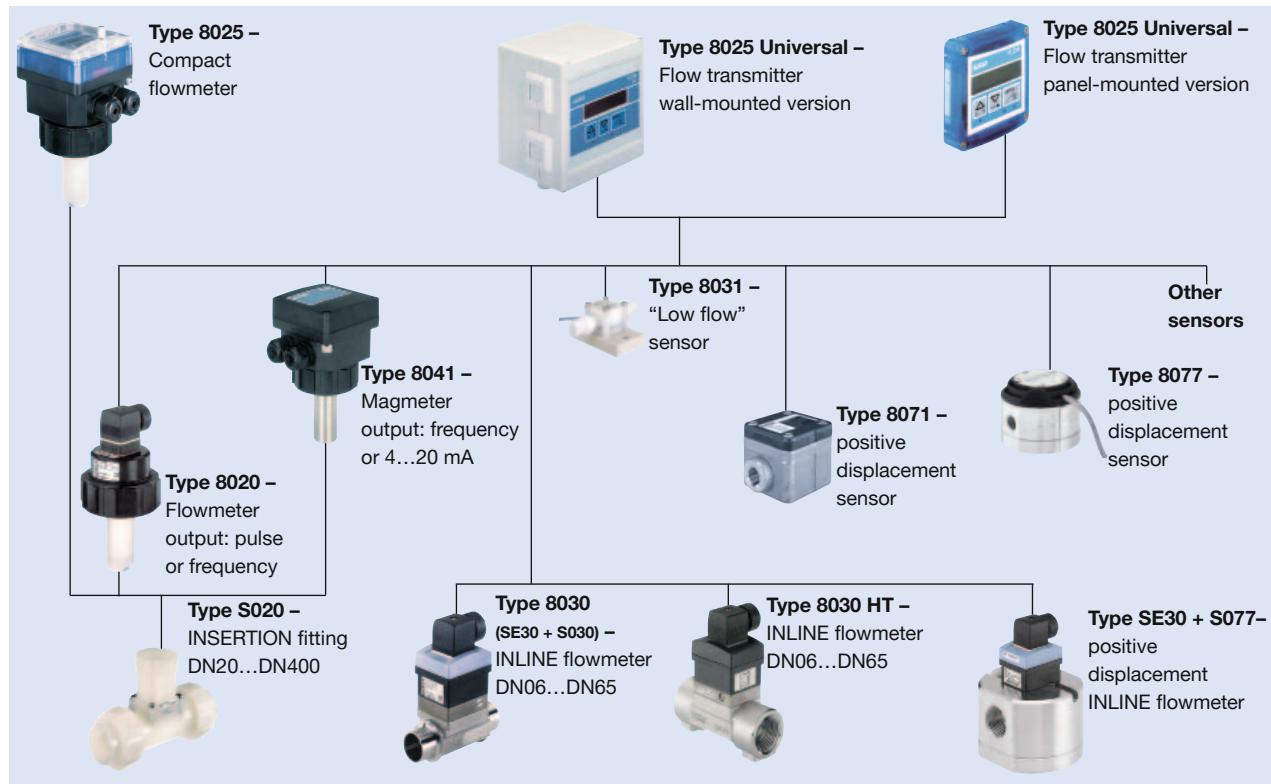

| Specifications | Item no. |
|--|----------|
| Spare part, panel version | |
| Mounting set (screws, washer, nuts, cable clips) | 554 807 |
| Seal | 419 350 |
| Set with 8 FLOW front panel foils | 553 191 |
| Spare part, wall version | |
| Power supply board 115/230 V AC + mounting instruction sheet | 555 722 |
