

Dräger FPS® 7000 Head-up Display (HUD) Accessories for Breathing Apparatus

One of the many benefits of the FPS® 7000 Facemask is the option of fitting a head up display. Always within the field of view the head up display allows easy monitoring of the cylinder contents without any manual action by the wearer.

Benefits

Easy to fit and remove

The display fits easily into the FPS 7000 facemask, and can be quickly fitted without the need for tools, saving time during maintenance. In an emergency you can transfer the HUD between facemasks in a matter of seconds.

Well Protected

The HUD is well protected in the facemask and can not be damaged by heat, shocks, humidity or chemicals.

Long battery life

Providing on average 360 hours of use and easily changed without the need for tools.

Wireless operation

The transmitter unit wirelessly transfers data to the facemask, avoiding time consuming connection of cables, reducing costs and connection errors.

Easy to read LED's

Red, amber and green LEDs provide precise information about your cylinders air pressure at all times. The display automatically adapts to ambient brightness enabling clear indication of pressure information , even under poor lighting conditions.

Additional low air pressure warning

In addition to the SCBA's primary low pressure alarm a red LED on the HUD flashes if the cylinder pressure reaches the low pressure warning threshold. This provides the wearer with an additional warning.

System components

D-13666-2010

Dräger FPS® 7000

The Dräger FPS® 7000 full-face mask series sets new standards in terms of safety and wearing comfort. Thanks to its enhanced ergonomics and the availability of multiple sizes, it offers a large, optimized field of vision and a very comfortable, secure fit.

D-57238-2012

Dräger Bodyguard® 1500

Dräger Bodyguard® 1500 is an automatic wireless PASS system which increases wearer safety in potentially hazardous situations. The system draws attention to colleagues in distress by generating distinctive visual and acoustic alert signals and features wireless data transmission from the pressure gauge to the PASS device.
